The diagram illustrates two parallel horizontal bars, each composed of three segments: a red segment on the left, a blue segment in the middle, and a red segment on the right. The top bar is connected to a grey bar on the right, and the bottom bar is connected to another grey bar on the right.

The diagram illustrates two parallel processes. On the left, there are two pairs of horizontal bars. Each pair consists of a red bar on top and a blue bar on the bottom. A vertical line connects the right end of the red bar to the right end of the blue bar. From the midpoint of this vertical line, a horizontal line extends to the right, connecting to a single grey bar. This structure is repeated for a second, identical process below the first one.

A diagram illustrating a process flow. On the left, there are two parallel horizontal bars: a red one on top and a blue one on the bottom. A vertical line connects the right end of the blue bar to the left end of a single grey bar on the right. The red bar is slightly longer than the blue bar.
